CLASSICAL VIOLINIST

ABOUT ME

Fueled by a strong passion for growth and building user-centric software, I am motivated by producing scalable results and I take a deep sense of pride in my work. I leverage my self-starter mentality and my collaboration skills to produce efficient, detail-oriented code. Upon joining your team, I will bring innovative solutions, an eager work ethic, and a contagious passion for producing high quality, product-driven software.

WORK EXPERIENCE

REN - CLIMATE TECH SAAS

Full Stack Software Engineer   **August 2023 - Present**

- Collaborated with product team and customer success to innovate software as a service aiding in the decarbonization of the global supply chain via Climate Tech Start-Up Company
- Proficient in using Git for version control, tracking changes, and collaborating with team members
- Experience with GitHub for code repository management and collaborative development
- Collaborated with cross-functional teams in an Agile environment to deliver features and improvements in timely iterations
- Participated in daily stand-ups, sprint planning, and retrospective meetings to ensure effective communication and project progress
- Identified and resolved bugs, improving overall application performance and user experience.
- Conducted code reviews to ensure code quality, adherence to best practices, and collaborative learning within the team.
- Actively engaged in self-directed learning and pursued additional training to enhance skills in emerging technologies
- Platform: https://www.ren.inc/platform

Key Accomplishment: Architected and implemented a robust system overhaul to optimize user experience, strategically rerouting key functionalities to enhance accessibility and streamline operations for clients.
